In the past, people did strange or dangerous things to be included in *Guinness World Records* (金氏世界紀錄). There are dozens of examples. Here are a few. One man holds a record for blowing a whole noodle out of his nose. Another man set a record by wearing 70 socks on one foot. There's more! An American kicked himself on the head 57 times, and a man kept 109 bees in his mouth for 10 seconds. What crazy records they are! However, for the health and safety of people, *Guinness World Records* has dropped some of the records that are too dangerous to do. It has also set some rules to keep people from trying to set dangerous records.

	include 納入	hold 保持	record 紀錄
	safety 安全	drop 將...除名

根據短文內容，選出正確的答案。

Pluto was found in 1930. It used to be the ninth planet in the solar system until the IAU (國際天文聯盟) changed it on August 24, 2006.

Many astronomers argued about whether to call Pluto a planet or not. Some thought that it was too small to be called a planet—it is even smaller than the Moon. So, at a meeting in 2006, the astronomers decided to take Pluto off the list of planets in our solar system.

Now, there are eight planets in the solar system. But if you are a fan of Pluto, don't worry. Astronomers sometimes change the rules. Perhaps they will change their mind at the next meeting. Who knows?
