Rabies is a kind of disease which can kill people if it is not taken care of right away. Taiwan was without rabies for many years. However, Taiwan hasn't been rabies-free anymore since June 2013. Three wild animals were found with rabies.

Many people in Taiwan connect rabies only to dogs because in Chinese, the word for “rabies” sounds like something about dogs. Many pet dogs have been thrown away because of the breakout of rabies. As a matter of fact, rabies has little to do with pet dogs. People usually get this disease if they are bitten by animals which carry rabies.

Though rabies sounds scary, the followings are some ways you can protect your pets and yourself from rabies:

1. Take your pets to the vet for a rabies vaccination very year.
